

**NEW
SERIES**

Quantified Societies & Selves

Series Editor: Phoebe V. Moore, University of Leicester, UK
Associate Editors: Btihaj Ajana, King's College London, UK;
Kendra Briken, University of Strathclyde, UK;
Ruth Cain, University of Kent, UK;
Kylie Jarrett, Maynooth University, Ireland;
Saori Shibata, Leiden University, Netherlands

Bristol University Press is delighted to announce a new book series that will explore the rapidly-expanding field of quantification research. *Quantified Societies and Selves* will publish authored and edited books on a range of topics, including governmental and corporate decision-making, management, security, healthcare and everyday lives as seen in local and global political economy, social and cultural worlds. The expected authors are major and/or emerging authorities in the wide range of fields covered and the series will represent an essential research resource for a major emerging field of study.

Books in Quantified Societies and Selves will publish work of between 80,000 – 120,000 words in length. Our publications will be aimed at academic audiences and are peer-reviewed, although given the nature of the series we encourage authors to consider how their work can be made accessible to non-specialist readers.

Call for book proposals

If you would like to discuss a proposal, please direct your email to *Phoebe V. Moore* (pm358@leicester.ac.uk) and, if desired, the associate editor in your area of interest:
