# Spaces and Practices of Justice

Series Editor: **Agatha Herman**, Cardiff University, UK

This global, interdisciplinary book series focuses on the intersections between spaces and practices of justice to provide innovative and important interventions on examples of real-world (in)justice.

The series demonstrates that critical studies of justice offer a key lens through which to understand past and current social, cultural, economic and environmental events and relations. This series brings together established and early career academics to publish original research providing critical, incisive and thought provoking reflection on contemporary issues within geographies of justice, development, politics, social theory and critical geography.
