

NEW  
SERIES

## Contemporary Issues in Science Communication

Series Editor: **Clare Wilkinson**, University of the West of England Bristol

As science communication continues to establish itself as a discipline in the twenty-first century, there has never been a better time to consider contemporary science communication and its practices. 'Fake' news and digital marketing are changing the context for science journalism.

This series will create a space to consider such science matters. In so doing it will also link the present with the past by publishing titles that develop our understanding of the history of science communication, both in practice and as an academic discipline.

### NEW IN THE SERIES

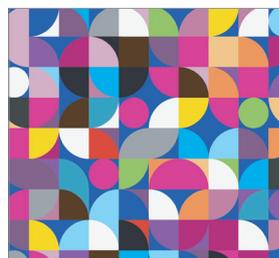

#### **Race and Socio-Cultural Inclusion in Science Communication**

Edited by **Elizabeth Rasekoala**

HB £85.00 ISBN 9781529226799  
EPUB £27.99 ISBN 9781529226812  
Jul 2023

Moving beyond tokenistic and extractive approaches, this book creates a space for academics and practitioners to challenge issues around race and socio-cultural inclusion. The authors provide mutual learning, paradigm-shifting perspectives and innovative ways forward for the science communication advancement agenda.

#### **Queering Science Communication**

Edited by **Lindy A. Orthia** and **Tara Roberson**

HB £85.00 ISBN 9781529224405  
EPUB £27.99 ISBN 9781529224429  
Apr 2023

This collection examines the place of queer people within science communication and asks what it means for the field to 'queer' science communication practice, theory and research agendas. Written by leading names in the field, it offers concrete examples for academics, students and practitioners who strive to foster radical inclusivity and equity in science communication.

## Call for proposals

---

Books in this peer-reviewed series will cover a range of topics relevant to contemporary science communication, including, but not limited to:

- Disciplinary insights: Definitions, history and ethics of science communication;
- the role of science and technology
- studies; expertise, replication and trust; interdisciplinary knowledge and ideologies.
- Science communication mechanisms and techniques: Citizen science; the role of public relations; knowledge and new forms of media; public policy; gaming, Sci-art and visual communication.
- Inclusivity in science communication: Gender, class, disability, ethnicity and other 'intersectional' perspectives; casualisation of science communication labour.

Proposals can also be focussed on specific science, health, environmental and other research subjects, provided the core theme is science communication or engagement related.

## Contact us

---

If you would like to submit a proposal, or discuss ideas, then please contact the Series Editor:
